

## **Graham Adler**

### **Professional Experience and Responsibilities**

Graham is a Senior Technical Architect that develops cross-platform solutions to meet his client's business needs. Graham provides transparency to his clients by creating a broad vision about the health of their technology environment. His future-minded philosophy connects business and IT departments, helping them understand their dependencies and empowering them with the ability to obtain combined goals and objectives for the company.

Graham is armed with 16 years IT operations experience. He has accomplished projects in two countries, United States and South Africa, and in a variety of industry capacities including insurance, mining, retail, and financial institutions.

In addition to Graham's IT history, he brings with him the experience of creating and running two successful technology consulting firms in South Africa. This distinctive characteristic provides him the capability to look at IT dilemmas from both the business and IT angle.

Graham has a passion for knowledge. He is curious, investigative and tenacious by nature. He lives by the philosophy of learning at least one thing new every day. Graham's studious and vibrant personality sparks many intriguing conversations allowing him to spread his knowledge and share his experience with clients.
